CARDIOVASCULAR, AORTIC ANEURYSM VASCULAR AND THYROID CANCER SCREENING

- ☒ *Recent clinical findings show an increase in thyroid cancer for both men and women*
- ☒ *Heart Disease the # 1 killer for men and women*
- ☒ *Stroke the #3 killer for men and women*

ABOUT THE FIVE SCREENS

This preventive screening program focuses on identifying early stages of heart disease, carotid (stroke), thyroid cancer (nodules), aortic aneurysm and vascular disease.

\$300.00 (5 Screens)

THYROID CANCER SCREENING - to identify nodules that are difficult to feel. *National data-thyroid cancer fastest increasing cancer in the U.S. for both men and women.*

ECHOCARDIOGRAM - looks at size, shape and movement of the heart. *Cardiovascular disease (CVD) remains the leading cause of death in the United States.*

CAROTID ARTERY ULTRASOUND - can identify plaque in the carotid arteries which can lead to stroke. *#3 disease for men and women/ on average, one American dies from stroke every 4 minutes.*

ABDOMINAL AORTIC ANEURYSM (AAA) -

An abdominal ultrasound is a painless screening that can detect AAA, which is vital, since most patients don't show symptoms. This test identifies enlarged abdominal aorta, which may suggest the presence of an aneurysm. A ruptured AAA can cause blood loss, shock and possible death.

Ankle Brachial Index (ABI) - looks for peripheral arterial disease and early diabetes. *Identifies hypertension -67 million American adults (31%) have high blood pressure—1 in every 3 American adults.*

Heartscan Services is HIPAA compliant and all results are strictly confidential.
The screening takes about 45 minutes

Heartscan Services Office
3000 Hempstead Turnpike, Suite 417 (4th floor), Levittown, NY 11756
